

## Upgrading firmware on EYEsurv IP Cameras

**Step 1:** Open a Browser ( Firefox, Chrome, etc) and type in the IP address of the EYEsurv IP Camera in the address bar then press enter. This will bring you to the IP cameras login page.

**Step 2:** Log in to the camera. Now click the “Setup” tab. On the left hand side of the menu click the “System” option.

TO FIND THE CORRECT FIRMWARE FOR A CAMERA GO TO [HTTP://WWW.NELLYSSECURITY.COM](http://www.nellyssecurity.com) TYPE THE CAMERAS MODEL NUMBER IN THE SEARCH BOX, PRESS ENTER.

**Step 3:** Next click the “Upgrade” option. Now you will see an area to browse for a firmware file. Click the “Browse” button and locate the correct firmware file for your camera.

CLICK THE LINK TO THE CAMERAS PAGE THEN CLICK THE DOWNLOADS TAB AT THE BOTTOM.

Once loaded click the “Upgrade” button to start the upgrade.
